§§ 1437.106-1437.200 [Reserved]

Subpart C—Determining Coverage for Prevented Planted Acreage

§ 1437.201 Prevented planting acreage.

- (a) Prevented planting is the inability to plant an eligible crop with proper equipment during the planting period as a result of an eligible cause of loss, as determined by CCC.
- (b) The eligible cause of loss that prevented planting must have:

(1) Occurred after a previous planting period for the crop and

- (2) Before the final planting date for the crop in the applicable crop year or in the case of multiple plantings, the harvest date of the first planting in the applicable planting period, and
- (3) Generally affected other producers in the area, as determined by CCC.
- (c) Producers must be prevented from planting more than 35 percent of the total eligible acreage intended for planting to the eligible crop and in the case of multiple planting, more than 35 percent of the total eligible acres intended to be planted within the applicable planting period.
- (d) Eligible prevented planting acreage will be determined on the basis of the producer's intent to plant the crop acreage, and possession of, or access to, resources to plant, grow, and harvest the crop, as applicable.
- (e) Acreage ineligible for prevented planting coverage includes, but is not limited to:
- (1) Acreage which planting history or conservation plans indicate would remain fallow for crop rotation purposes; and
- (2) Acreage used for conservation purposes or intended to be or considered to have been left unplanted under any program administered by USDA, including the Conservation Reserve and Wetland Reserve Programs.

§1437.202 Determining payments for prevented planting.

(a) Subject to limitations, availability of funds, and specific provisions dealing with specific crops, a payment for prevented planting will be determined by:

- (1) Multiplying the producer's total eligible acreage intended for planting to the eligible crop by the producer's share:
- (2) Multiplying the product of paragraph (a)(1) of this section by 65 percent:
- (3) Subtracting the total acres planted from the product of paragraph (a)(2) of this section;
- (4) Multiplying the product of paragraph (a)(3) of this section by 50 percent of the producer's approved yield;
- (5) Multiplying the product of paragraph (a)(4) of this section by the final payment price for the producer's crop as calculated by the agency under §1437.11.
- (b) Yields for purposes of paragraph (a) of this section shall be calculated in the same manner as for low-yield claims.

§§ 1437.203-1437.300 [Reserved]

Subpart D—Determining Coverage Using Value

§1437.301 Value loss.

- (a) Special provisions are required to assess losses and calculate assistance for a few crops and commodities which do not lend themselves to yield loss situations. Assistance for these commodities is calculated based on the loss of value at the time of disaster. The agency shall determine which crops shall be treated as value-loss crops, but unless otherwise announced, such crops shall be limited to those identified in §§1437.303 through 1437.309 as value loss crops. Lost productions of value loss crops shall be compensable only under this subpart.
- (b) The crop year for all value loss crops is October 1 through September
- (c) Producers must file an application for coverage in accordance with §1437.6, and must:
- (1) Provide a report of the crop, commodity, and facility to CCC for the acreage or facility, in a form prescribed by CCC, no later than the beginning of the crop year.
- (2) Maintain a verifiable inventory of the eligible crop throughout the crop year; and

(3) Provide an accurate accounting of the inventory, as required by CCC.

§1437.302 Determining payments.

Subject to all restrictions and the availability of funds, value loss payments for qualifying losses will be determined by:

(a) Multiplying the field market value of the crop before the disaster by

50 percent;

- (b) Subtracting the sum of the field market value after the disaster and value of ineligible causes of loss from the result from paragraph (a)(1) of this section;
- (c) Multiplying the result from paragraph (a)(2) of this section by the producer's share:
- (d) Multiplying the result from paragraph (a)(3) of this section by 55 percent plus whatever factor deemed appropriate to reflect savings from non-harvesting of the damaged crop or other factors as appropriate;

(e) Multiplying the salvage value by

the producer's share;

(f) Subtracting the result from paragraph (a)(5) of this section from the result from paragraph (a)(4) of this section

§ 1437.303 Aquaculture, including ornamental fish.

- (a) Aquaculture is a value loss crop and is compensable only in accord with restrictions set in this section. Eligible aquacultural species shall only include:
- (1) Any species of aquatic organisms grown as food for human consumption as determined by CCC.
- (2) Fish raised as feed for other fish that are consumed by humans; and
- (3) Ornamental fish propagated and reared in an aquatic medium.
 - (b) The aquacultural facility must be:
- (1) A commercial enterprise on private property;
- (2) Owned or leased by the producer, with readily identifiable boundaries; and
- (3) Managed and maintained using good aquacultural growing practices.
 - (c) Producers must:
- (1) Ensure adequate and proper flood prevention, growing medium, fertilization or feeding, irrigation and water quality, predator control, and disease control; and

- (2) Have control of the waterbed.
- (d) Eligible aquacultural species must be:
- (1) Placed in the facility and not be indigenous to the facility; and
- (2) Kept in a controlled environment; and
- (3) Planted or seeded in containers, wire baskets, net pens, or similar device designed for the protection and containment of the seeded aquacultural species.
- (e) In the crop year in which a notice of loss is filed, producers may be required, at the discretion of CCC, to provide evidence that the aquacultural species are produced in a facility in accordance with paragraphs (b), (c) and (d) of this section.

§1437.304 Floriculture.

- (a) Floriculture, except for seed crops as specified in paragraph (d) of this section, is a value loss crop and is compensable only in accord with restrictions set in this section. Eligible floriculture shall be limited to commercial production of:
- (1) Field-grown flowers, including flowers grown in containers or other growing medium maintained in a field setting according to industry standards, as determined by CCC; and
- (2) Tubers and bulbs, for use as propagation stock of eligible floriculture plants; and
- (3) Seed for propagation of eligible floriculture plants.
- (b) Floriculture does not include flowering plants indigenous to the location of the floriculture facility or acreage.
- (c) Eligible floriculture must be grown in a region or controlled environment conducive to the successful production of flowers, tubers, and bulbs, as determined by CCC.
- (d) Claims on losses on the production of flower seed for propagation of eligible floriculture plants will not be treated under "value loss" rules, but under the rules for normal production low yield crops under subpart B of this part.
- (e) The facility or acreage for eligible floriculture must be managed and maintained using good floriculture growing practices. At a minimum, producers are responsible for providing a
